

**DATE:** June 1, 2002  
**TO:** ENDF Utility Code Recipients  
**FROM:** C. L. Dunford, NNDC, Brookhaven National Laboratory  
**SUBJECT:** Release of ENDF Utility Codes, Version 6.13

Version 6.13 of the ENDF utility codes is now available. This release corrects all bugs in version 6.12 reported to NNDC before May 1, 2002 and incorporates all format changes adopted prior to this date. The release contains the following:

CHECKR	FIZCON	PSYCHE
GETMAT	STANEF	INTER
LISTEF	PLOTEF	SETMDC

The programs require a Fortran-95 compiler. Executables are available for VMS, Windows, and UNIX operating systems. GETMAT, LISTEF, and PLOTEF will no longer be supported when version 7 of the ENDF format is adopted.

NNDC no longer makes distributions on tape unless specifically requested. You may retrieve these programs via anonymous FTP using the following procedure:

```
FTP FTP.NNDC.BNL.GOV
FTP> user anonymous
Password: (enter any identifier)
FTP> cd [.endf.utility.????]
FTP> get file_name_in file_name_out
.
.
FTP> quit
```

where

```
???? is replaced by ANS for ANSI standard batch mode
                      VAX for OpenVMS systems
                      UNX for Unix systems
                      WIN95 for Windows systems
```

The programs can also be downloaded via the Web from the URL
